Experience

Senior Software Engineer

July 2024 – Present

SS&C Technologies

- Developed code for an enterprise trust management and accounting application
- Reduced page load times by 40% for commonly used screens by converting legacy XSL pages to Vue.js interfaces powered by .NET APIs
- Increased user satisfaction by redesigning the application's navigation experience and building persistent UI customization features backed by a SQL database
- Reduced time to ship bug fixes by migrating high-traffic application code to GitHub and utilizing GitHub Actions and Node.js for automated intraday builds and deployments

Software Engineer

Mar. 2024 – July 2024

Spatial Front, Inc.

- Built government software for the U.S. Department of Transportation using Angular, Node.js, and SQL deployed on AWS infrastructure
- Helped increase Agile team velocity by over 16 story points per sprint through efficient coding and increased collaboration to unblock other developers

Software Engineer

Feb. 2022 – Sept. 2023

Spoak Decor

- Implemented a new design system for a design software startup using Vue.js, TypeScript, and Tailwind CSS as part of a product redesign
- Added 25% more usable workspace area to the graphic editing interface by consolidating menus and removing infrequently used features from the main interface
- Reduced product import time by building a Node.js microservice to categorize web scraper results

Skills

Languages: JavaScript, TypeScript, SQL, C#, Python, HTML/CSS

Frameworks: Vue.js, React, Node.js, Next.js, ASP.NET Core

Tools: Git, Microsoft SQL Server, Claude Code, GitHub Copilot

Projects

Dewdayte – dewdayte.com

Next.js and React-based task management application

Floor Plan Tool – floorplan.iankranz.com

Interactive floor plan drawing tool built in TypeScript

Education

Cornell University

Bachelor of Science: Electrical and Computer Engineering

Aug. 2015 – May 2019

3.97 GPA, Magna Cum Laude
